GCI Exhibit 6.5 contains all of the schedules in redacted format. Schedules with Company Proprietary information are being provided separately. The Proprietary version should be distributed only to those persons who have signed appropriate Confidentiality agreements.

Revisions reflect changes from the schedules provided in GCI Exhibit 6.3 filed with Mr. Smith's rebuttal testimony. E-3, E-5 and E-15 are revised to reflect one year of the proposed normalization of pension settlement gains and asset disposition accrual. E-18 is revised to reflect correction by Ameritech of information it had provided in response to data requests concerning the amount of reciprocal compensation expense in the test year. Summary schedules are revised to reflect the impact of the other revisions.

Restore Revenues Foregone from Failure to Meet Service Quality Standards

Line No.	Description	Annual Amount (\$)	Cumulative Amount (\$)	Reference
Penalties for failure to meet service quality standards are recorded by IBT as reductions to revenue via the annual price cap filings. The annual reductions and the cumulative impact on the 1999 test year identified by the Company for failure to meet service quality standards are as follows:				
1	1996	\$ 4,063,661	\$ 14,222,814	CUB 17.26
2	1997	\$ 4,224,784	\$ 10,561,960	CUB 17.26

6	Uncollectibles as a percentage of revenue		0.0167	Schedule A-1
7	Estimated impact on Uncollectibles		<u>\$ 494</u>	L.5 x L.6

Notes

[A] The effect of the adjustment is to reflect 1999 test year revenue as if the Company had been in full compliance with quality of service standards, i.e., had not incurred any quality of service penalties affecting the 1999 test year revenue level.

The Company's response to data request CUB 17.26 provided the cumulative impact on 1999 test year revenue associated with the Company's failure to meet Illinois service quality measures. The adjustment is revised to reflect the cumulative effect, as calculated by the Company, on 1999 test year revenue associated with the Company's failure to meet service quality standards.

Notes and Source

The Company changed its accounting policy in 1999 and reduced its exempt M&S balance by \$15.8 million in October 1999. See response to data request CUB 5.9.

Monthly amounts for M&S for November 1999 through September 2000, after the accounting policy change, were provided in the responses to data requests SDR-017 and CUB 13.3.

The \$2.258 million balance was used by the Company on its Exhibit 7.0, Schedule 2, because it was the balance in Account 1220.1 as of 12/31/99. This amount appears to be too low. For example, the Company's response to data request CUB 13.3(c) indicates that IBT anticipates an M&S balance of between \$3.5 to \$4 million over the next 12-18 months.

As shown on schedule E-11, I used \$3.5 million to derive the rate base allowance, prior to non-regulated and intrastate allocations.

A \$3.5 million allowance is somewhat greater than the average balance of M&S since the accounting policy change, as shown above, but appears to be within a range of reasonableness.

Notes

[A] IBT response to CUB 13.11(a), calculation of intrastate ADIT amounts based on SDR-018

[B] IBT response to CUB 13.11(c)

[C] Per discussions with Company representatives, the \$60 million ADIT debit balance item for "competitive declaration" was removed by IBT in deriving the \$281 million intrastate rate base balance shown on IBT Ex.7.0, Schedule 2, Column E; however, the intrastate portion of the ADIT debit balance associated with the merger issues adjustment for Uncollectibles remains included within the derivation of the Company's \$281 million intrastate ADIT balance. The Company representatives estimated the intrastate portion of the ADIT balance relating to merger issues Uncollectibles was between \$19 million and \$20 million. This adjustment removes \$19 million to reflect the removal of the ADIT debit balance for the Company's merger issues Uncollectibles adjustment from intrastate rate base.

Notes

Per the response to data request CUB-16.1, in March and June of 2000, IBT recorded approximately \$60.7 million of credits to Account 6540 for settlement of disputed reciprocal compensation bills between Ameritech Illinois and other carriers and for reversal of accruals for reciprocal compensation expense. Some portion of these credits appears to relate to reciprocal compensation expense recorded by IBT in Account 6540 in 1999; however, the exact amount cannot be determined from the information provided by IBT to date.

The level of reciprocal compensation expense incurred by IBT is impacted by the minutes of use for calls originating in IBT's service area for internet service handled by CLECs and ISPs.

The response to CUB-16.1(h) stated that the 1999 expense was so much higher than 1998 due to the relatively high internet minutes of usage by customers. The response to CUB-16.1(i) stated that internet minutes of use by customers were relatively equal in 1999 and 2000, and the settlement of disputed bills referred to above contributed to the decrease in 2000 versus 1999 reciprocal compensation expense.

To normalize the level of reciprocal compensation expense and reflect the impact of the settlement of disputed bills, an average of the monthly reciprocal compensation expense for the months of 1999 and 2000 is used.
